

World Peace Council

Statement of strong condemnation

The World Peace Council denounces to the international community the today's murderous military attack of Israel against Palestine in the Gaza Strip, during which more than 200 Palestinians lost their lives. This criminal air strike against innocent civilians, against the same Palestinians who are now for weeks under the Israeli siege and blockade, is one more proof for the inhuman and brutal regime of Israel. The war drive policy of Israel is killing the Palestinians in a slowly genocide, fully supported and endorsed by the powerful imperialist forces in the USA and the EU.

The WPC calls upon all peace loving forces in the world to express their protest and condemnation against the Israeli regime, against the injustice which is lasting already 60 years against the Palestinian people.

The WPC underlines the moment of the Israeli aggression, only few weeks before the Parliament elections in Israel, which shows once more the immoral character of the regime which does not hesitate to use hundreds of dead Palestinians for the internal electoral campaign.

The WPC reaffirms its support to the PLO, as the legitimate representative of the Palestinian people to whom we express our firm solidarity and call for unity and resistance against the aggressions. The only just and viable solution can come with the establishment of an independent State of Palestine within the borders of 1967 with East Jerusalem as its capital.

The injustice against Palestine will not last for ever!
Free and Independent Palestine!

The Secretariat of WPC Saturday 27th December 2008
